REGULATION NO. 2.—BASIS FOR CLASSIFICATION
OF DAIRY-FARMS.

For the purpose of classification of dairy-farms by the Provincial Inspector, and as a basis for the allotment of marks by him for the condition of dairy-farms pursuant to the Act, the following is prescribed as a standard for stables and milk-houses on a dairy-farm and for the equipment and utensils used there:—

(a.) All stables shall be properly and sufficiently ventilated so as to preserve the atmosphere pure and wholesome at all times, and shall be so constructed as to provide not less than six hundred cubic feet of air-space and four square feet of window-area for each head of cattle kept therein.

(b.) The material used in the construction of the floor-gutters and mangers in all stables shall be concrete or wood of good quality; the floors and floor-gutters of all stables shall be water-tight; the floor-gutters shall be of ample depth and width; the drainage of all stables shall be so constructed that all liquid matter that may fall or be cast upon the floor may be conveyed by a suitable channel to a drain inlet situate in the open air; such drain inlet shall be provided with a suitable trap connection, and the drain shall have a proper air-vent either situate not less than forty feet from any window or door of the stable or carried to an elevation equal to that of the building in which the stable is situate.

(c.) In all stables, the distance between each floor-gutter and the wall shall not be less than four feet. Where in any stable there is a double row of cattle-stalls so constructed that the rows of mangers face one another across the central aisle, there shall be a space between such rows of mangers of not less than five feet; and where in any stable there is a double row of stalls with the mangers facing towards the walls of the stable, the space between the floor-gutters of each row of stalls shall be not less than six feet.

(d.) Every stable situate in the basement of a barn shall be provided with a dust-proof ceiling which shall be not less than eight feet in height from the ground floor.

(e.) All stables shall be kept clean at all times, and shall be whitewashed twice in each year, or more often, if directed by the Provincial Inspector.

(f.) A supply of pure water shall be maintained suitable and sufficient for all purposes of each stable. The receptacle provided for such water shall be emptied and thoroughly cleansed from time to time as often as may be necessary to prevent pollution of any water which may be stored therein, and shall be placed so as to be at all times readily accessible.

(g.) No fodder or cattle-food which contains or is affected by mustiness, mould, decay, or filth shall be brought into any stable or fed to cattle kept therein.

(h.) No person who is unclean in clothing or person shall be permitted to milk cows or handle milk in any stable.

(i.) All cows for milking purposes shall be cleaned before being milked, and shall not be fed with dusty or dust-producing food for at least half an hour before milking, nor during milking, nor until after all the milk is removed from the stable. The milk shall be placed in a closed receptacle as each cow is milked and removed from the stable and cooled as soon as practicable. The milking shall be done in a cleanly manner and in a clean atmosphere. All dust shall be avoided immediately before and during milking.

(j.) All manure and wet litter shall be removed from the stable every morning and evening to a place not less than forty feet distant from the stable and so situate as to prevent pollution of cattle or contamination of yards. A closed receptacle or tight building shall be provided for such manure and litter.

(k.) Cows shall be cleansed after calving, and all cows kept for milking purposes shall be free from purulent discharges of any nature.

(l.) No milk taken from any cow during the period of three weeks before she calves, or during the period of three days after she calves, or thereafter until the condition of her milk has become normal shall be sold or supplied for human consumption.

(m.) All cows kept for milking purposes shall be subjected to the tuberculin test at least once each year, and more often if directed by the Minister. On each visit of a Provincial Inspector all cows present in the herd at the time of its last inspection by a Provincial Inspector shall be accounted for to his satisfaction.

(n.) The material used in the construction of the floors of all buildings in which milk is cooled, separated, or stored (in this regulation referred to

as "milk-houses") shall be of concrete or dressed matched lumber. If wooden material is used in the construction of floors, it shall be treated with some substance to prevent the absorption of liquids. The junction of the wall and floor shall be water-tight. The floors of all milk-houses shall be constructed on an inclined plane, and gutters shall be so arranged that all liquid matter which may fall or be cast upon the floor and all water which has been used shall be carried out to a point not less than one hundred feet from the milk-house or discharged into a sewer through a trapped drain. All milk-houses shall be provided with sufficient light and ventilation and must be kept sweet and clean at all times.

(o.) No milk-house shall be attached to or form part of any barn, stable, or dwelling, nor be located near the stable-yard or any source of contamination. No milk-house shall be located less than thirty feet from any other building.

(p.) Screen doors and screen windows or other suitable appliances shall be provided of a kind effective to keep flies and vermin from all milk-houses and all dairy utensils.

(q.) All dairy utensils shall be free from rust, with all seams and joints soldered on the inside and perfectly tight-fitting. All milk-houses from which milk is to be supplied for human consumption without previous pasteurization shall be equipped with means of steaming the utensils effectively. All utensils shall be cleansed, scalded, or steamed on each occasion after being used, and shall be aired and kept free from dust. Small-topped pails constructed entirely of metal shall be used in milking.

(r.) Milk-wagons or other vehicles used in transporting milk shall be kept clean at all times, and suitable provision shall be made for the protection of milk against dust, rain, and the direct rays of the sun.

The matters and things comprised in the standard set out in this regulation shall not be construed as forming a complete or exclusive basis for the allotment of marks by the Provincial Inspector, but shall be deemed to be supplementary to such other matters and things as may be provided for by the Minister in the exercise of his authority under the Act to prescribe a method and a score-card for the allotment of marks to dairy-farmers, as to the condition of their dairy-farms.

REGULATION No. 3.—STANDARD FOR CERTIFIED MILK.

The following is prescribed as the standard for "certified" milk or cream, as the case may be, for the purposes of section 16 of the Act: The milk or cream shall be produced on a dairy-farm certified by a Provincial Inspector to be classed as Grade A under the Act, and shall be so produced and shall be dealt with subject to and in full compliance with the following conditions and directions:—

(1.) All buildings in which certified milk is produced or handled shall be apart from other buildings and protected from dust of roads and fields. The surroundings shall be free from dirt, rubbish, animal or vegetable waste, and be well drained and dry:

(2.) All necessary measures shall be taken to prevent the entrance of flies and other insects, rats and other vermin into the buildings, and to prevent closets or privies, hog-pens, hen-houses, or manure-piles from exposure to flies or from being sources of bad odours:

(3.) The milk-house shall be located at a distance of not less than thirty feet from the cow-stable or other building, and at a distance of not less than one hundred feet from any dwelling, or any greater distances required by the Medical Health Officer of the municipality in which the milk is to be consumed, or his designated representative (hereinafter called the "Medical Health Officer"), and there shall be no hog-pen, hen-house, manure-pile, or any closet or privy other than of a modern approved sanitary flushing type within three hundred feet of it:

(4.) The milk-house shall contain a cooling and bottling room, a wash and sterilizing room, and a boiler-room, separate, and to be used only for their proper purposes in the production of certified milk alone. The floors shall be of concrete. No animals shall be allowed therein. While in use the cooling and bottling room shall be entered only by persons employed therein or by qualified Inspectors. Thermometers shall be used on all sterilizers:

(5.) Pastures to which the cows have access shall be free from marshes, stagnant pools, contaminated streams, or from infectious matter and plants which might affect the milk deleteriously. In all cases on a dairy-farm producing certified milk, where those premises frequented by the herd immediately adjoin other premises or roads to which other live stock have access, a system of double fencing shall be employed to prevent infection, in a manner satisfactory to the Medical Health Officer:

(6.) No horses, hogs, dogs, or other animals or fowls shall be housed with the herd producing certified milk. All cows kept in the same barn with the milking-cows shall receive the same provision and care. Three-teated cows shall be excluded from the herd:

(7.) All bedding shall be fresh, clean, dry, absorbent, and reasonably free from dust. Where an exercise-yard, shelter, corral, or shed is provided, the floor of such shall be made of non-absorbent material properly graded and drained and shall be kept clean at all times:

(8.) Cleaning of the stable shall be done not less than one hour before milking-time and the floor shall be swept and kept free from refuse. Manure, when removed from the stable, shall be hauled directly to the field and spread, if possible. If stored temporarily near the cow-stable it shall be placed in a concrete container screened against flies and be removed to the fields and spread at least every seven (7) days. During the summer months (April 1st to October 15th) manure shall not even temporarily be stored within three hundred feet of the cow-stable or milk-house:

(9.) All long hairs shall be clipped from the udder, flanks, and from the tail above the switch of each cow. The switch shall be cut to clear the ground. All cows shall be groomed before each milking, all dirt being removed by means of a curry-comb, a stiff brush, and by washing with a clean cloth and clean water. The grooming shall be completed half an hour before the time of milking. The udders when washed shall be wiped with a clean damp cloth:

(10.) All foodstuffs shall be kept in an apartment separate from the cow-stable and be brought into the stable only immediately before the feeding-hour, which shall follow the time of milking:

(11.) An inspection of the milk-house in which certified milk is cooled, bottled, sealed, and handled shall be made at least once a month by the Medical Health Officer:

(12.) When application is made for a certificate under section 16 of the Act, a tuberculin test of the herd shall be made, and if any of the animals react a second test shall be made within sixty to ninety days. If no reactor is found a certificate may be granted. Thereafter the herd shall be tested semi-annually until it passes three successive tests without any reactions, after which it shall be tested annually, but when any reactions occur an additional test shall be made within sixty to ninety days, followed by further tests as before provided. If no reactors are found on the first test, the second test shall follow in six months. If the entire herd has been subjected to a tuberculin test within sixty days prior to a receipt of the application, this may, if satisfactory, be accepted as the first test:

(13.) All reactors shall be removed from the herd immediately after discovery and the milk shall be discarded and the stables and exercise-yards used by them shall be cleaned and disinfected in a manner satisfactory to the Medical Health Officer:

(14.) Each cow in a certified herd shall be sketched, labelled, or tagged with a number or mark which will permanently identify her:

(15.) Each cow shall be registered in a herd record, which shall be accurately kept by the dairy-farmer, so that her entrance, departure, and dates of her calving-period and tuberculin-testing can be ascertained. This record shall be accessible to the Medical Health Officer and the dairy-farmer shall be responsible for its accuracy:

(16.) No cow known or suspected to be diseased shall be permitted to remain in the milking herd. Any cow showing signs of disease, or under suspicion of being diseased, shall be immediately removed from the milking-stable to a separate building provided for such animals and the milk shall not be used. Any cow affected with mastitis (garget) shall be removed from the milking herd, even if only one-quarter of the udder is affected, and none of the milk from any of the quarters shall be used. No cow removed on account of disease shall be returned to the milking herd without the approval of a veterinarian:

(17.) Milk from all cows shall be excluded for a period of thirty days before and seven days after parturition. Cows shall not be permitted to calve in the milking-stable or in the stable where the herd is housed, and shall not be returned to said stable while the uterine discharges are putrid or purulent and under no condition before the seventh day following parturition:

(18.) In the event of the occurrence of a disease which appears to be of a serious character, between the visits of the veterinarian, or if a number of cows become sick at about the same time, it shall be the duty of the dairy-farmer to withdraw such affected cattle from the herd, and to notify the veterinarian immediately, and to withdraw such milk from sale pending his inspection:

(19.) A veterinary inspection (including a careful physical examination) of each cow in the herd shall be made at least once a month:

(20.) Adequate lavatory facilities shall be provided for the milkers. The hands of the milkers shall be thoroughly washed and scrubbed before milking commences; they shall be washed and carefully dried before the milking of each successive cow. The practice of moistening the hand with milk is forbidden:

(21.) Milkers and other persons handling the milk shall wear clean suits and caps that shall be worn for no other purpose, and these when not in use shall be kept in a clean place protected from dust and dirt:

(22.) Employees shall not use tobacco or intoxicating liquor while in the cow-stable or in the milk-house. During milking, the milkers shall be careful not to touch anything but the milking-utensils and the cow's teats. Employees are forbidden to spit upon the floors or walls of the stables or upon the floors or walls of the milk-house:

(23.) Toilet facilities, provided for the milkers and others handling milk, shall be of a modern, approved, sanitary flushing type and shall be located outside of the dairy buildings, not in proximity to the bottling-room or receiving-room. All toilets shall be properly screened and shall be kept clean, and there shall be readily accessible thereto a properly equipped lavatory:

(24.) The first streams of milk from each teat shall be rejected. Such milk shall be milked through a very fine-meshed strainer to help to determine the presence or absence of garget and be collected in a separate vessel, and shall not be milked upon the floors or into the gutters. If the milk from any cow is bloody, stringy, or in anywise unnatural, the milk from that cow shall be rejected, and the cow shall be removed from the milking herd and shall not be returned until approved by the veterinarian. If dirt gets into the pail, the milk shall be discarded and the pail washed and sterilized before it is used again. The pails shall be protected from extraneous contamination. Promptly after the milk is drawn it shall be removed from the stable and strained through strainers made of double layers of finely meshed cheese-cloth or absorbent cotton or other approved material, thoroughly sterilized. Several strainers shall be provided for each milking in order that they may be frequently changed:

(25.) The milk shall be cooled and bottled immediately after being milked, and shall be kept at a temperature above freezing and below 45° F. until delivered to the consumer:

(26.) The milk shall be bottled, capped, and sealed upon the dairy-farm where it is produced. After being cooled and bottled it shall be immediately capped and sealed in a manner satisfactory to the Medical Health Officer. The inner cap shall be applied only by a suitable capping-machine. The seal shall include a sterile hood which completely covers the lip of the bottle, which cannot be used a second time for sealing the bottle, and shall be of such design and colour and show the name of the dairy-farm and such other information as may be required by the Medical Health Officer.

(27.) The milk shall be delivered to the consumer within thirty (30) hours from the time of milking:

(28.) Every employee for milking or handling milk or to be regularly employed on the dairy-farm shall be examined by the Medical Health Officer or his designated representative, or a qualified physician approved of by him, before assuming his duties, and all necessary laboratory tests shall be made when such are indicated.

(29.) The physician shall visit the dairy-farm weekly and examine all those who milk or handle the milk and all regular dairy-farm employees, and shall report to the Medical Health Officer upon blank forms supplied for that purpose. This report shall be countersigned by the dairy-farmer:

(30.) No person suffering from any communicable disease or known to be a typhoid carrier shall be employed in the production of certified milk. No person known or suspected to have had typhoid fever shall be employed except by special permit of the Medical Health Officer. Satisfactory evidence of successful vaccination against smallpox within seven years shall be presented before employment:

(31.) A record shall be kept on the dairy-farm premises of each employee, which shall show his name and address, date of employment, his medical history, results of physical examinations of cultures and other laboratory tests:

(32.) When employees live upon the dairy-farm their dormitories shall be subject to approval by the Medical Health Officer. Sufficient bathing and toilet facilities shall be provided for employees living on the dairy-farm:

(33.) Examinations of milk are to be made frequently at the discretion of the Medical Health Officer. All samples required for examination shall be furnished by the distributors and collected by the Medical Health Officer. The samples to be examined shall be obtained from milk as offered for sale. The samples shall be kept in properly iced containers:

(34.) Certified milk shall contain not over ten thousand (10,000) bacteria (colonies) per cubic centimetre during the months from and including May to October and five thousand (5,000) bacteria (colonies) per cubic centimetre during the months from and including November to April. If the count exceeds the above limits a further count shall be made, and if normal counts are not restored within ten days the certificate of the Medical Health Officer given under section 16 of the Act may be suspended or cancelled. Bacterial examinations shall be made as soon as possible after collection and in no case shall the interval be over three hours:

(35.) The methods and technique used in the chemical and bacteriological examinations of certified milk shall conform to the standard methods and technique for chemical and bacteriological examinations of milk:

(36.) Certified milk shall have undergone no pasteurization or sterilization. Certified milk shall contain an average of 4 per cent. of butter-fat, with a minimum of 3.5 per cent.; this average to be based on samples taken throughout a period of not over ninety days:

(37.) All specifications governing certified milk, except in relation to butter-fat and bacteria, shall also apply to certified cream:

(38.) The percentage of butter-fat in certified cream shall be stated on the cap of the bottle in which the cream is delivered to the consumer.

REGULATION No. 4—CLASSES OF MILK AND CREAM.

The following four classes of milk and cream are prescribed:—

P.C. No. 1116.

CERTIFIED TO BE A TRUE COPY OF A MINUTE OF A MEETING OF THE COMMITTEE OF THE PRIVY COUNCIL, APPROVED BY HIS EXCELLENCY THE GOVERNOR-GENERAL, ON THE 23RD MAY, 1930.

THE Committee of the Privy Council have had before them a report, dated 14th May, 1930, from the Superintendent-General of Indian Affairs, submitting that the Cook's Ferry Indian Reserve No. 4A was confirmed by Order in Council P.C. 2410, dated 31st October, 1890. The right-of-way of the Canadian Pacific Railway was excepted and taken to be 100 feet in width. The railway is constructed on a steep hillside and the plan as finally approved by the Board of Railway Commissioners shows a varying width of from 425 to 450 feet. The right-of-way does not touch the water, the extra width being on the mountain-side. The Department of the Interior is under obligation to hand over the required right-of-way to the Canadian Pacific Railway free of charge. The aforesaid parcel of land may be described as follows:—

Being in the Seventeenth Township, in the Twenty-fifth Range, west of the sixth meridian, in the Province of British Columbia, composed of all that portion of Section Three of the said township which lies within the limits of Cook's Ferry Indian Reserve No. 4A, and is taken for right-of-way of the main line of the Canadian Pacific Railway, as the said right-of-way is shown edged in red upon a plan of survey across the said land and lands adjoining the same, which said plan is signed by James F. Carden, Dominion land surveyor and British Columbia land surveyor, on the 17th day of October, A.D. 1904, and of record in the Department of the Interior under Number 11195, a duplicate whereof is on record in the Land Registry Office at Kamloops under Number 287; saving and excepting thereout all that portion of the said right-of-way which lies within two lines parallel to and fifty feet perpendicularly distant on opposite sides from the centre line of the said right-of-way, the said portion herein transferred containing by admeasurement twenty-four and sixteen-hundredths acres, more or less.

The Committee, on the recommendation of the Superintendent-General of Indian Affairs, advise that authority be granted for the transfer to the Department of the Interior of the aforesaid parcel of land, pursuant to the provisions of section 46 of the "Indian Act," so that title for the same may be issued to the railway company.
